

# Innovations for Fresh-Cut Processors

## Foreign Material and Product Defect Removal

Key's suite sorting solutions provide multiple opportunities to detect and remove foreign material and defects from your product before it gets to the consumer. From a wide selection of wash solutions, to state-of-the-art camera, laser and Vis/IR detection, you can count on Key.

Refer to the other side of this brochure for a complete listing of Key's Fresh-Cut solutions.

## Sorting Technology

Combining state-of-the-art camera, Vis/IR and laser-based sensors with world-class product handling, Key provides best in class foreign material detection and removal with **Optyx®** and **Tegra®** Inspection systems. Detect and remove bugs, rodents, snakes, rocks, wood, glass, plastic, metal, cardboard and EVM, as well as core and product defects, with minimal yield loss. Join the growing list of fresh cut processors who rely on Key to protect their brand quality.

## Wash Technology

Our washing solutions provide effective removal of dirt, sand, floating bugs, tiny insects, grubs, and rocks or other sediment. Wash options include **Basket Wash**, **Compact Wash**, **Direct Stream™**, **Wash**, **Iso-Flo® Shaker Wash**, and **Whole Product Wash**. Choose from a wide range of flexible options to make your wash system an integral part of your GMP and HAACP programs.
